## School Internship Programme of D.El.Ed. a Birds' Eye View

School internship is widely regarded as the single most important component of any teacher education programme. This will provide the student teacher a platform for integrating theory they learnt from the classroom situation. It consists of full-time work in a school to going intensive experiences in planning, teaching, engaging their school activities, preparing instructional support materials and performing all other duties that a regular teacher is expected to do. The field experience intends to expand the competencies and skills which are essential for a teacher to serve as a facilitator of teaching. During internship student teachers interact with teachers, students, administrator and community including parents and try to understand the issues. Problems faced, which help in their development as a teacher. They are also exposed to multicultural context of our society, which has a strong influence on the classroom environment and their functioning. The practice teaching in real classroom situations, student teachers are also provided with opportunities to participate and organize various programmes which help to develop attitude, interest, abilities and appreciation as a teacher.

Two year D.El.Ed programme should provide ample opportunities for the student teacher to engage with various stake holders like child, community, and school on a partnership model. Teaching practice and internship is meant for providing first hand experiences to the student teachers in classroom teaching and whole school life in general. This will also need to give the student teachers chance to link in the theoretical knowledge with its practical accomplishment.

The student teacher is expected to critically reflect and discuss these practices and engage in activities like maintenance of records and registers, preparation of lesson plan and unit plans, classroom management, activities related to school community, parent interface, and reflection on self-development and professionalization of teaching practice. The activities undertaken during internship period will be presented in portfolios and reflective journals. The student teachers are expected to record their experiences, observations and conclusion regarding all the activities undertaken.

It is provided through various activities spread over two years in different phases. The focus in the first year is on introducing the student teacher to different types of school, its environment, some understanding of children, developing and reflecting on teaching learning materials and engaging as a regular teacher at primary level. In the second year the student teacher will function as a regular teacher, experiment innovative methodologies, reflect on his/her own teaching and participate actively in various activities of school other than teaching learning process.
